

THIS IS HEPATITIS... KNOW IT.

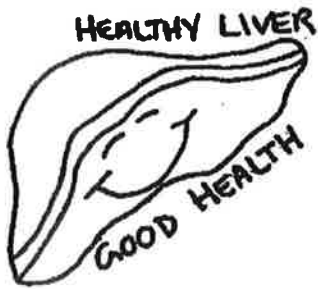

Confront it. Hepatitis affects everyone, everywhere.

One in twelve people have hepatitis B or C and the only way to know if you have been infected is to have your blood tested. If you are concerned about your risk or need more information, talk to your health care provider. **July 28th is World Hepatitis Day**, we all can make a difference by acting now!

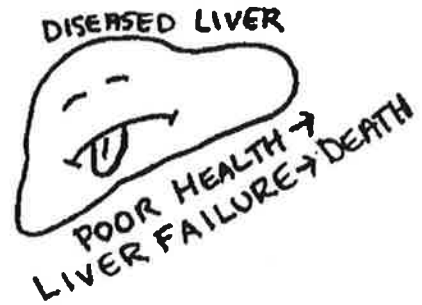

get protected • get vaccinated • get tested • get treated

2011 World Hepatitis Day

Thursday, July 28th

DO YOU KNOW??.....
Hepatitis causes liver disease.
One in twelve people have
hep B or C, many people don't
