HEP CAN'T WAIT...

Know the facts:

- Hepatitis A, hepatitis B, and hepatitis C are infections in your liver that are caused by a virus
- About 600,000 people in Canada have hepatitis B or hepatitis C
- Hepatitis can lead to liver failure, cirrhosis, liver cancer, or need for liver transplant
- You should get vaccinated against hepatitis A and B

Prevent the spread of hepatitis B and C:

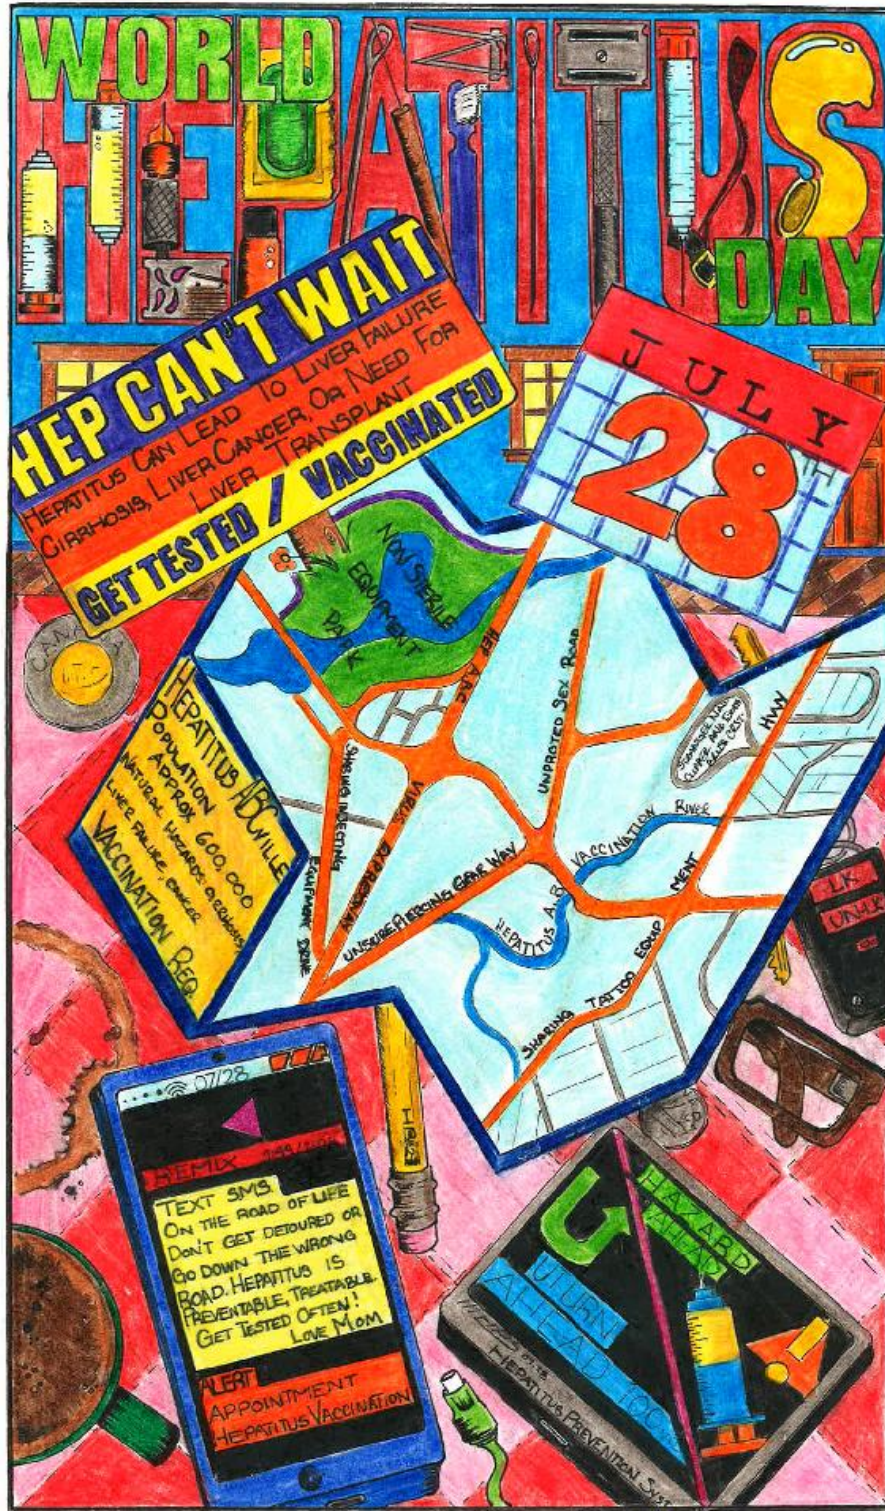

1. Don't share injecting, tattooing or piercing equipment; but if you do share, use bleach to clean these items
2. Use a condom or dental dam & water-based lubricant for safer sex
3. Don't use someone else's toothbrush, nail clippers, or anything that could have blood on it

GET TESTED.... HEP CAN'T WAIT.
