By Flora Ducharme, RPC Regional Psychiatric Centre

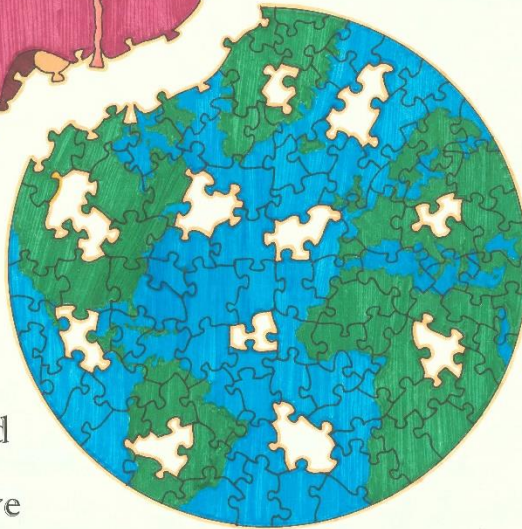

Appreciation Award (\$100)  
By Shari Heathen, Fraser Valley Institution

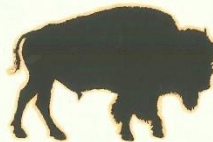

World Hepatitis Day is July 28<sup>th</sup>

FINDING  
THE  
MISSING  
MILLIONS

BREAKING  
THE  
BARRIERS  
TO  
DIAGNOSIS

Currently,  
325 million  
people around  
the world live  
with viral hepatitis.  
Only 11% are aware  
of their status, meaning  
millions of people are  
living with hepatitis and  
don't even know it.

If left  
untreated,  
hepatitis can  
lead to liver failure,  
cirrhosis, liver cancer,  
or need for liver  
transplant. Please let's  
help these 11%  
become more aware.

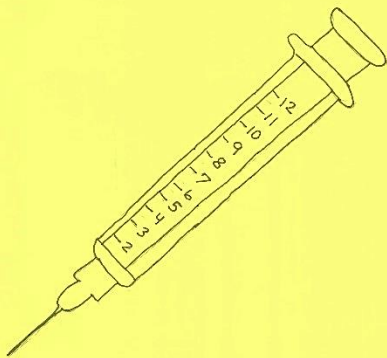

Appreciation Award (\$100)  
By Elisha Jimmy, Fraser Valley Institution
