World Hepatitis Day is July 28th

Hepatitis can lead to liver failure, cirrhosis, liver cancer, or need for liver transplant

Don't share injecting, tattooing or piercing equipment

Use a condom or dental dam for safer sex

**Currently, 290 million people
around the world live with
viral hepatitis unaware.
Hepatitis can lead to liver
failure, cirrhosis, liver
cancer, or need for a liver
transplant.**

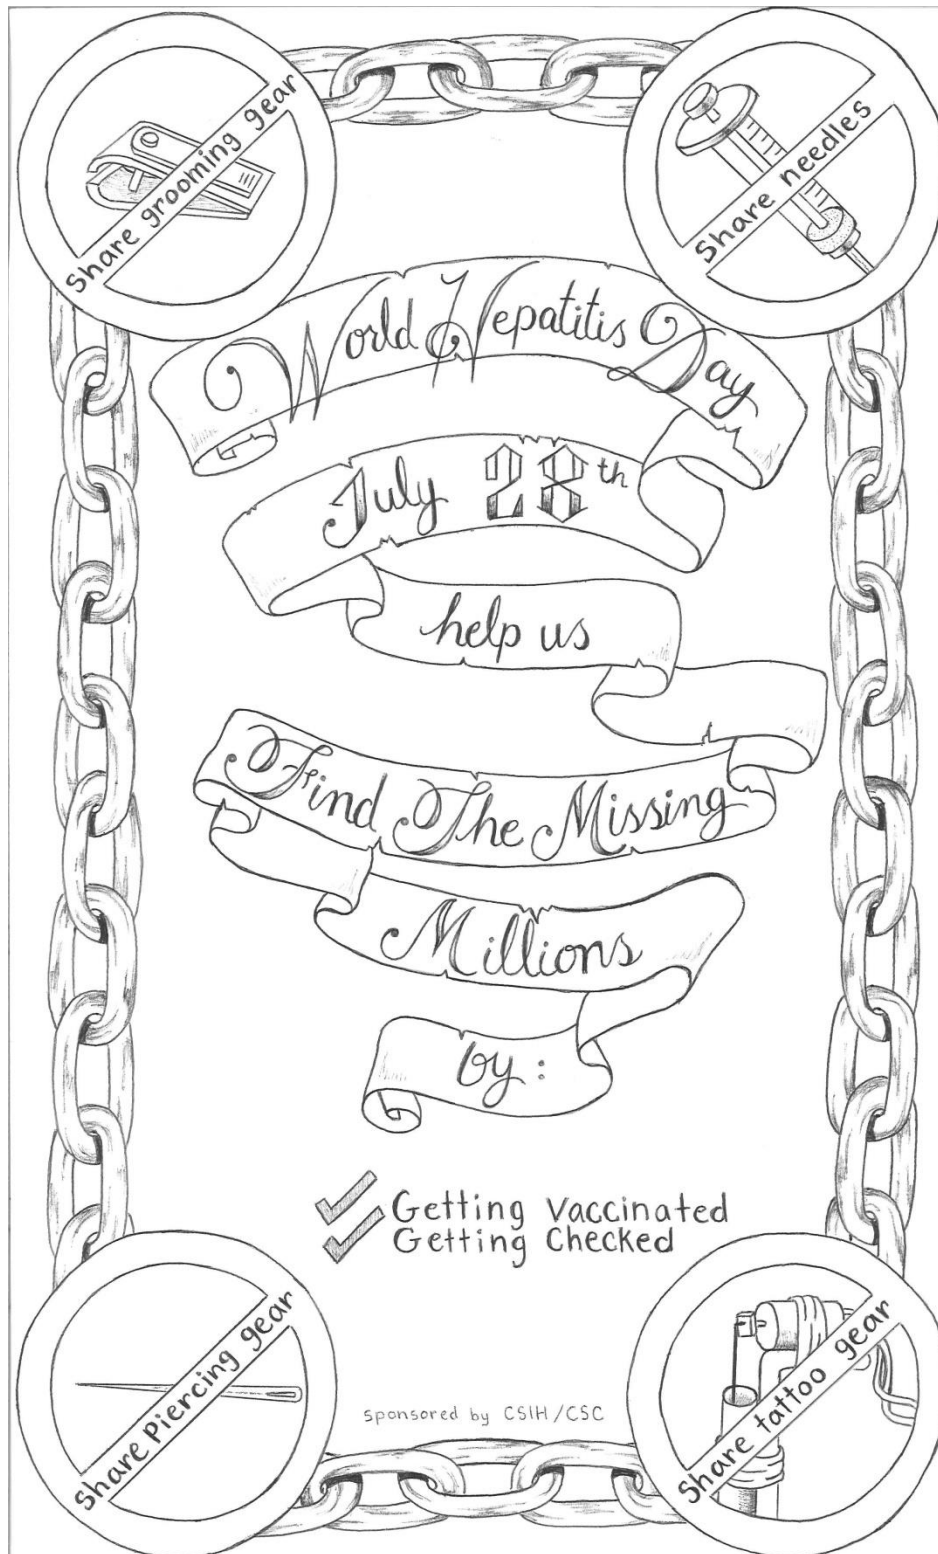

Don't use someone else's toothbrush, nail clippers or anything that could have blood on it

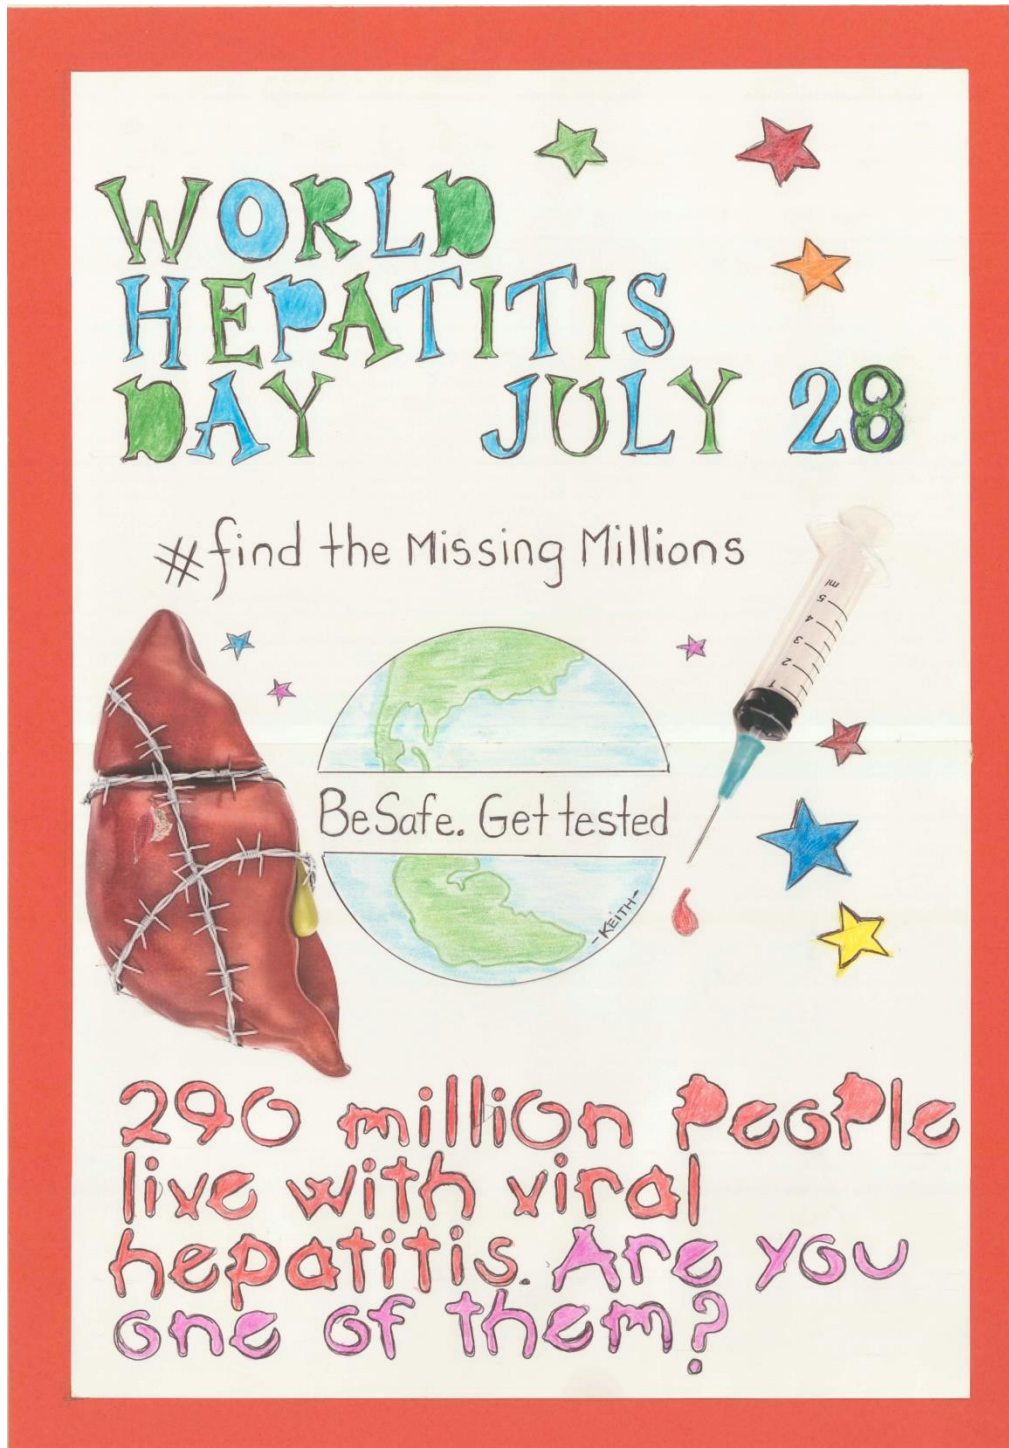

Find the missing millions. Are you one of them? Get tested today

Darren Johnstone
